

Nnamdi Anyaele

Senior Backend Engineer

Lagos, Nigeria | +234 706 385 8333 | anyaelennamdi@gmail.com | github.com/NnamdiAnyaele

PROFESSIONAL SUMMARY

Senior backend engineer with 6+ years of experience building APIs, internal platforms, and backend systems across fintech, mobility, and AI-powered SaaS products. Strong background in Node.js, TypeScript, NestJS, Python, FastAPI, PostgreSQL, Redis, and Docker. Experienced in microservices, asynchronous processing, search-backed workflows, authentication, payments, notifications, and admin operations.

BACKEND STACK

Languages: TypeScript, JavaScript, Python, SQL

Backend Frameworks: NestJS, Express.js, FastAPI

Architecture: REST APIs, microservices, gRPC, API gateways, background jobs

Databases & Search: PostgreSQL, MySQL, MongoDB, Prisma, SQLAlchemy, Redis/Valkey, Meilisearch, pgvector

Platform & Tooling: Docker, AWS, Celery, Swagger/OpenAPI, Git, GitHub, Jira

Engineering Practices: Unit testing, integration testing, schema design, debugging, code reviews

SELECTED BACKEND EXPERIENCE

Backend Engineer

January 2026 - April 2026

Carbon Connect - Carbon Funding Navigator | Remote

Project-based engagement

- Built and maintained FastAPI services for company data, carbon-profile workflows, notifications, and AI-assisted grant application support.
- Worked on PostgreSQL and pgvector-backed data models, asynchronous processing with Celery and Redis/Valkey, and search-backed grant discovery with Meilisearch.
- Supported backend workflows for a platform that searches across 100k+ grant documents and helps SMEs discover and qualify for EU carbon funding opportunities.
- Contributed to ingestion and classification flows for multiple funding sources, including grant sync, eligibility scoring, and backend reliability improvements.

Technologies: Python, FastAPI, PostgreSQL, pgvector, Celery, Redis/Valkey, Meilisearch, AWS

Backend Developer

September 2025 - April 2026

Point2 | Remote

Project-based engagement

- Built backend services for the Point2 mobile and admin platforms within an Nx-based NestJS microservices architecture.
- Worked across 10+ backend service domains including gateway, auth, users, operators, bookings, payments, notifications, analytics, and admin operations.
- Designed and updated PostgreSQL and Prisma-backed schemas, JWT-based authentication flows, Redis-backed session and caching patterns, and service-to-service communication over gRPC.
- Helped deliver backend capabilities for a multi-service mobility platform covering ride, courier, freight, and tow workflows.

Technologies: TypeScript, NestJS, Nx, PostgreSQL, Prisma, gRPC, Redis, JWT, Swagger

Software Engineer

August 2021 - Present

CardinalStone | Lagos, Nigeria

Full-time

- Delivered backend and full-stack features across 8+ internal and customer-facing fintech platforms spanning shareholder services, KYC, recruitment, research, e-accreditation, payments, and operations support.
- Built business workflows and platform features supporting onboarding, customer requests, portfolio access, and internal processing using Node.js and SQL/NoSQL databases.
- Worked on production issue resolution, API behavior, database operations, and test-backed improvements for business-critical web applications.
- Collaborated across frontend and backend delivery, with strong ownership of platform logic, data flows, and system behavior in production.

Technologies: Node.js, JavaScript, MongoDB, MySQL, PostgreSQL, Docker

ADDITIONAL EXPERIENCE

Full-Stack Engineer

November 2024 - April 2025

Turing | Remote, United States

- Contributed to an AI-powered charting product for large-scale datasets, improving performance and data accuracy in a distributed engineering workflow.

Software Engineer Associate (Mentor)

September 2022 - June 2024

Decagon | Lagos, Nigeria

- Mentored software engineering trainees through code reviews, technical feedback, and delivery guidance.

Software Engineer

March 2021 - August 2021

Decagon | Lagos, Nigeria

- Built backend and full-stack features for MusicBox using Node.js, Express.js, JavaScript, and MongoDB.

Associate Software Engineer

November 2019 - December 2020

Lehinet Solutions | Benin City, Nigeria

- Built web applications and internal client solutions using React and JavaScript across frontend-focused delivery environments.

EDUCATION

Federal University of Technology, Owerri

Bachelor of Engineering (B.Eng.), Chemical Engineering

November 2010 - December 2015

CERTIFICATION

SCRUMstudy - Scrum Fundamentals Certified (SFC)

March 2021
